

User Story: Home Page

1. Home page(User)

➤ Requirement:

As a user, I want the homepage display header and footer and the content will display latest product and I can add product to cart, sales information and the online support.

➤ Dev Task:

- The website will contain header, footer, and other function
- The main content will display in the center

There slides show display sale, latest product and user can add product to cart

➤ Acceptance Criteria:

- Blank to type username, password.
- Check with database to verify the account.
- Deny request to log in if check whether username's wrong or password's wrong. Notice the user to let them know the situation.
- Re-direct to confirm email page to get the new password.

➤ Definition of Done:

- Passes all regression tests.
- If verification is success, user could log in into system. If failed, they have to re-type or re-confirm the email.

➤ Prototype and demo:
