Review Product(User)

➢ *Requirement:* As a user, I want to rate product and give some comment. In product detail page, the bottom of page has comments of others and a comment box and rate star. Click on number of star and give some comment, I click into send. After click comment added into the top of comments.

➢ *Dev Task:*
- User can access page detail
- User can only comment when they logged in
- System query database and add comment into top of comments

➢ *Acceptance Criteria*
- Given: User is on page detail
- And: He hasn't logged into yet
- When: He comments
- Then: He sees an error page stating that he needs to login the system to comment
- Given: User logged into the system
- When: He fills in the form to comment
- And: He clicks "Send" button
- Then: The system notices "success"

➢ *Definition of Done*
- This function passes all test cases
- The user can add comments when they login
- The system will notice "error" when the user has not logged in

➢ *Prototype*
